

First Author Last Name	Abstract Title	Submission Number
Case Series/Study		
Abell	Implementing a Bedside Pressure Mapping System to Enhance a Pressure Ulcer Prevention and Healing Program	CS-01
Agosti	Novel Treatment Effective to Attain Closure of Chronic Wounds: Saving Time, Costs, and Improving Patient Outcomes	CS-02
Agosti	The Significance of DNA-Targeted Wound Management for 21 Year Old Recalcitrant Wounds	CS-03
Ali	Simple Inexpensive Technique for Delayed Closure of Diabetic Foot Wound	CS-04
Alvarez	High Resolution Ultrasonic Wound Assessment is a Diagnostic Tool to Identify Underlying and Occult Pathology of Chronic Wounds	CS-05
Baldursson	A Pilot Study of Fish Skin Derived ECM on Chronic Ulcers	CS-06
Baptiste-Savoie	Use of Negative Wound Pressure Therapy with Gauze to Manage Enterocutaneous Fistula	CS-07
Batzer	Maximizing Healing Outcomes with Keratin Based Wound Products	CS-08
Batzer	A Novel Treatment for Deep Partial Thickness and Shallow Full Thickness Burns Relieves Pain, Speeds Healing and Prevents Scarring	CS-09

Bazarov	Initial Clinical Assessment of a Novel Multifunctional Topical Ointment for Difficult-to-Heal Wounds	CS-10
Bennedsen	Reducing Dressing Change Frequency, Decreasing Hospital Time and Overall Cost, and Improving Outcomes in Patients with Superficial Thermal Cold Injury (Frostbite) in the Inpatient as well as Outpatient Setting Using Silver Hydrofiber as the Primary Dressing	CS-11
Benskin	Persistence Pays for Pyoderma Patient Using Polymeric Membrane Dressings	CS-12
Berke	The Effect of Active Leptospermum Honey Gel on the Wounds of Patients with Immune Compromise	CS-13
Bishop	Hyperbaric Oxygen Therapy in Irradiated Tissue in the Pelvis Complicated by Vesicocutaneous Fistula	CS-14
Brett	Clinical Case Series of the Efficacy of a Hydrocellular Polyurethane Foam Dressing W/A Silicone Adhesive Containing Antimicrobial Silver in the Treatment of a Variety of Wounds	CS-15
Brett	Clinical Case Series of the Efficacy of a Multi-Site Hydrocellular Polyurethane Foam Dressing W/A Silicone Adhesive in the Treatment of a Variety of Wounds/Conditions	CS-16
Buell	Enhancing Comprehensive Pressure Ulcer Prevention and Healing Program Through the Use of Bedside Pressure Mapping	CS-17
Castelino	Reducing Perioperative Pressure Ulcers in Thoracic, Cardiovascular, and Spinal Surgery patients: Achieving ZERO Incidence is Possible!	CS-18
Chelesvig	Elastic Compression to Control Edema is Synergistic with Negative Pressure Wound Therapy to Heal Ulcers: Controlling Periwound Edema Speeds Healing	CS-19

Chelesvig	Limiting Elastic Compression to One-Fifth of the Skin Surface Area Improves Clearance of Edema: Longitudinal Fuzzy Wale Compression Speeds Healing of Chronic Leg Ulcers	CS-20
Chen-Vitulli	The Management of Stalled Wounds on Patients of Variable Compliance Levels With a 100% Native Collagen Obtained from Bovine Dermis	CS-21
Cruger	Who Would Have Thought..... Novel Uses for a New Non-Powered NPWT (Negative Pressure Wound Therapy)	CS-22
Curran	Case Studies in Acute Care and Outpatient Setting Utilizing a Transparent Absorbent Acrylic Dressing in Partial and Full Thickness Wounds	CS-23
Davis	Use of a An Antimicrobial Soft Silicone Bordered Foam Dressing as an Adjunctive Treatment with a Single Layer Bioengineered Dermal Tissue	CS-24
Davison	A Pilot Study of Keratin Dressings in Skin Graft Donor Sites	CS-25
DeLeon	Use of Microclimate Manager Over Pressure Redistribution Surface	CS-26
Dennis	Post Total Knee Arthroplasty Iatrogenic Arterio-Venous Fistula Associated with Intractable Chronic Ulcers and Leg Edema	CS-27
Dobson	Flowable Soft Tissue Scaffold	CS-28
Droz	Carboxymethylcellulose Dressing with Strengthening Fibers (CMC-SF): An Old Friend with a New Look	CS-29

Ennis	Clinical Experience with a Novel Regenerative Template for Hard to Heal Wounds	CS-30
Eron	Maggot Debridement Therapy for Complex Wounds in Diabetics	CS-31
Eron	Collagen for Wound Closure	CS-32
Fore	A Novel Topical Therapy for Pyoderma Granulosum Using Compounded Hydrolyzed Type I Bovine Collagen	CS-33
Freeman	Pressure Ulcer Prevention in High Risk Cardiovascular Surgery Patients	CS-34
Gardner	Utilization of a Novel Active Leptospermum Honey Gel Dressing for Debridement and Healing of Venous Leg Ulcers	CS-35
Gilbert	Successful Combination of NPWT and a Fistula/Wound Manager to Contain and Promote Healing of Wounds with Non-Pouchable High Output EC Fistulas	CS-36
Hall	Limb Salvage Through Total Contact Casting	CS-37
Hamm	Prevention of Surgical Incision Dehiscence and Infection in an Acute Care Hospital	CS-38
Harrison	Successful Healing of Digit Wounds with One Dressing	CS-39

Hayes	Bacteriostatic Dressing Use in Conjunction with an Enzymatic Debriding Agent to Facilitate Improved Wound Outcomes in a Geriatric Population	CS-40
Hermans	Hydration Response Technology for the Management of NPWT-Indicated Wounds: Results of a Series of 6 Cases	CS-41
Ho	The Use of Polyacrylate Gel Dressing as an Alternative Option to Sharp Debridement and NPWT	CS-42
Hudson	Clinical Assessment of a Simplified Single-Use NPWT Device	CS-43
Hughes	Venous Ulcers and Negative Pressure Wound Therapy	CS-44
Hurlow	Clinical Experience with a New Absorbent Dressing	CS-45
Ivins	Successful Management of Hard-To-Heal Chronic Wounds with a Novel Negative Pressure Wound Therapy Device: First European Experience	CS-46
Johnson	Reducing the Barriers to Healing Using a Hydroconductive Dressing	CS-47
Johnson	A 10 Patient Evaluation of a Hydroconductive Dressing Within a Complex Wound Clinic	CS-48
Johnson	Using a Hydroconductive Dressing to Improve Healing in Complex Surgical Wounds	CS-49

Johnson-Arbor	Efficacy of a 0.01% Silver Nitrate Solution Used for Wound Irrigation	CS-50
Jolley	Assessment of Tri-Layer Extracellular Matrix Efficacy in Treating Chronic Lower Extremity Wounds	CS-51
Jones	Consideration of the Impact of Molecular Diagnostics and Personalized Topical Therapy on the Sequential Bacterial Census of Chronic Wounds	CS-52
Karr	Case Series Presentation of the Benefits Of A Silver Antimicrobial Negative Pressure Dressing When Used With A Negative Pressure Wound Therapy Device for Improved Wound Healing, Decreased Negative Pressure Wound Therapy Dressing Changes, and Overall Cost Savings	CS-53
Karr	Case Series Presentation of the Biopsychosocial Benefit of a Community Health Education Program's Impact in the Hospital Out-Patient Wound Care Center Setting	CS-54
Kerzner	Novel use of Leptospermum Honey for Pin Site Care	CS-55
King	Improving Efficiency of Bed Bathing Process for Dependent Patients	CS-56
Kotz	Clinical Case Series of the Efficacy of a Hydrocellular Polyurethane Foam Dressing W/A Silicone Adhesive in the Treatment of a Variety of Trauma Wounds	CS-57
Krasner	Acute and Chronic Wound Applications in the Long Term Care Setting for a Soft Silicone Foam Border Dressing with Silver: A Clinical Case Series Demonstrating Value	CS-58
Lerman	Clinical Evaluation of the Use of Foam with a Portable NPWT System for the Treatment of Chronic Ulcers	CS-59

Liden	Use of Ovine Dermal Template to Treat Chronic Wounds	CS-60
Liguori	The Use of a New Active Leptospermum Honey Gel Under Negative Pressure Wound Therapy: a Case Series	CS-61
Loor	Cleveland Clinic Evaluation of an Ultraportable Mechanically Powered NPWT System for the Treatment of Acute Post-Surgical Incision and Drainage Wounds	CS-62
Lullove	Use of Silver Oxysalts in Post-Operative Foot Surgery to Prevent Infection: Clinical Case Studies	CS-63
Mahoney	Use of a Polyvinyl Alcohol Foam Impregnated with Methylene Blue and Gentian Violet to Promote Wound Bed Granulation and Epithelialization in Lower Extremity Wounds	CS-64
Mahowald	A Case Series Using Collagenase and Active Fluid Management Absorbent Dressing	CS-65
McArthur	Wound Healing Over Exposed Implanted Metal: A Unique Case	CS-66
McGovern	A Comparative Effectiveness Evaluation Between Two Heel Protectors	CS-67
McGuire	Treatment of a Dermal Fungal Infection, Complicated by a Secondary Bacterial Infection Using a Novel Hydrophobic Dressing	CS-68
McKenney	Bioelectric Dressing Trial in the Non-Compliant Patient	CS-69

Mier	Case study: The effectiveness of Collagen Products to Treat Non-Healing Scalp Wounds with Bone Exposed Status Post Mohs Micrographic Surgery to Treat Non-Melanoma Skin Cancer	CS-70
Miller	A Small Study Highlighting the Use of Pressure Mapping as an Indicator of Quality Control	CS-71
Milne	Treatment of Interdigital Maceration of Toe Web Spaces Using an Antimicrobial Absorptive Dressing	CS-72
Monnens	Continuous Diffusion of Oxygen as an Adjunctive Therapy to Moist Wound Therapy	CS-73
Morton	Tumors That Present as Lower Extremity Ulcers	CS-74
Motta	A Multi-Center Prospective Clinical Evaluation and Treatment Cost Comparison of a New Higher Valence State Silver Oxysalts Dressing	CS-75
Mullins	A Prospective, Open Evaluation of a New Silver Dressing in the Management of Partial Thickness and Deep Partial Thickness Burns	CS-76
Otiko	Multi-Case Study of Topical Site Specific Antibiotic Delivery in Human Field Studies of Diabetic Lesions	CS-77
Park	Case Series: Transdermal Continuous Oxygen Therapy (TCOT) on Complex Patients with Chronic Wounds	CS-78
Park	Case Series Study: Effect of Silver Solution on Chronic Ulcers	CS-79

Peotter	Human Placental Membrane Allograft for the Treatment of Chronic Lower Extremity Wounds - A Case Series	CS-80
Perez-Clavijo	Use of Xenograft as an Extracellular Matrix to Repair Chronic, Necrotic Eschars	CS-81
Perumal	Use of Hydroconductive Dressing to Treat Traumatic Avulsive Injury of the Face – A Case Report	CS-82
Philbin	Use of a Highly Absorbent Dressing for Multiple Wound Types	CS-83
Philbin	Simple Solutions for Complex Wounds of Multiple Types	CS-84
Powers	Ulcerating Livedoid Vasculopathy Healed with a Bilayered Skin Construct (BSC)	CS-85
Powers	Ulcers in the Setting of Substance Abuse	CS-86
Reddy	Closed Incision Management Using Negative Pressure Therapy for High-Risk Cardiac Patients	CS-87
Redmond	A Case Study Series Using Keratin Based Technology for Skin Tears	CS-88
Reyna	The Use of Active Leptospermum Honey in Common Pediatric Wound Etiologies	CS-89

Romanelli	From Portable to Ultraportable Negative Pressure Wound Therapy: A Switch Concept for Complete Wound Closure	CS-90
Rondeau	The Use of PVA-Foam Dressing Impregnated with Methylene Blue and Gentian Violet in Combination with Tissue-Engineered Skin Substitute Therapy	CS-91
Sardo	Chronic Wounds and the Role of Portable Single Use Negative Pressure Therapy in an Acute Care Hospital	CS-92
Saucier	Use of an Ionic Topical Silver Solution with Menthol as a Wound Cleansing Agent in Venous Ulcerations	CS-93
Shapiro	Evaluation of Presentation and Care of Patient's Preceding Lower Extremity Amputation in a Sole Provider Hospital in Northern New Mexico	CS-94
Sison	Dermal Substitute Managed with Polymeric Membrane Dressings Improve Stalled Outcomes	CS-95
Smith	Evaluating an Antimicrobial Hydrophobic Mesh in Application with Negative Pressure Wound Therapy	CS-96
Smith	Exudate Control in Heavily Exudating Ulcers Treated Managed with a Carboxymethylcellulose (CMC) Dressing with Strengthening Fibers	CS-97
Solit	Treatment of Chronic Venous Stasis Ulcers Complicated by Venous Insufficiency	CS-98
Speece	Fournier's Gangrene: A Case Study for Effective Pain Free Treatment in Preparation for Successful Grafting Using NLFU	CS-99

Stavosky	A New Atraumatic Contact Layer Wound Dressing for Use on Living Skin Equivalents	CS-100
Steele	A Novel Approach to the Effective Management of a Non-Healing Peristomal Wound	CS-101
Strange	Diagnosis Criteria for Identification of Vitamin C Deficiency in Patients with Wounds	CS-102
Suzuki	Treatment of Severe Venous Leg Ulcer Using Unique Bacteria-Binding Dressing with a Fatty Acid Contact Layer, Combined with a Multi-Layer Compression Dressing	CS-103
Tamir	Radiofrequency Ablation of Foot Perforator for Treating Recalcitrant Venous Wound	CS-104
Triglia	Wound Care Made Easy Across the Continuum: From Acute Care to Long Term Acute Care and Beyond	CS-105
Tukpah	Aged Spinal Cord Injury Veterans with Recalcitrant Pressure Ulcers treated with Platelet-Rich-Plasma Gel	CS-106
Ud-Din	*Significant Reduction of Symptoms of Skin Scarring with Electrical Stimulation: Evaluated with Subjective and Objective Assessment Tools	CS-107
Warner	1st Place Case Series/Study - Lower Extremity Venous Disease and Fall Risk Scores in a Community Hospital Inpatient Setting	CS-108
Weir	Case Review of the Clinical Use of an Antimicrobial PVA Foam	CS-109

Widgerow	Stevens-Johnson Syndrome/Toxic Epidermal Necrolysis - Topical Treatment Influencing Systemic Response	CS-110
Winnick	The Impact of an Organized, Web-Based, Protocol-Driven System of Wound Care on Delivery, Outcomes, Nurse Engagement and Cost with a Home Healthcare Service	CS-111
Wisnieski	Honey is Synergistic with Fuzzy Wale Elastic Compression to Improve Healing of Refractory Venous Leg Ulcers	CS-112
Wisnieski	Sodium Hypochlorite Hydrogel Debrides Necrotic Wound Tissue	CS-113
Wolcott	Novel HumiFiber Advanced Wound Dressing Study	CS-114
Wolcott	Utilizing the Self Regulating Moisture Control of a Humafiber Dressing to Manage a Single Complex Wound	CS-115
Wong	Full Leg Application of a 2 Layer Cohesive Short Stretch Compression System for Rapid Limb Volume Reduction and Chronic Edema Management	CS-116
Worth	Failure is Not an Option: Bioelectric Wound Care as a Means to Successful Skin Regeneration in Hard to Heal Wounds	CS-117
Worth	Bioelectric Wound Care: Hope for Hidradenitis Suppurativa?	CS-118
Yildiz	Application of Autolog Bone Marrow Cell In Venous Ulcer Case	CS-119

Yurttas	Multifocal Wound Treatment Approach of Patient with Mycosis Fungoides: To Improve Quality of Life and Infection Prevention	CS-120
Zanotti	Strategies for the Prevention of C-section Incision Site Infections in High Risk Patients	CS-121
Zhao	Combined Application of Negative Pressure Wound Therapy and Hypertonic Glucose for Treatment of Soft Tissue Defect-A Case Series	CS-122
Zimmer-Presutti	An Evaluation of a Carboxymethylcellulose (CMC) Dressing with Strengthening Fibers	CS-123
Clinical Research		
Alvarez	*Treatment of Arterial Ulcers and Ischemic Pain in Inoperable Patients with Peripheral Arterial Disease (PAD) and Critical Limb Ischemia (CLI) Using High-Pressure, Rapid Sequence, Intermittent Pneumatic Calf and Foot Compression (HPIPC): Interim Results of a Randomized Clinical Trial	CR-01
Alvarez	Effectiveness of a Novel Static Pneumatic Gradient Compression Therapy Device (SPGC) for the Treatment of Venous Leg Ulcers (VLU) and Chronic Venous Insufficiency (CVI)	CR-02
Alvarez	Accurate Detection of Osteomyelitis in Chronic Wounds Using High Resolution Diagnostic Ultrasound (HRUS) in the Outpatient Wound Care Center Setting	CR-03
Baharestani	Assessment of Pressure Ulcer Detection and Staging Ability	CR-04
Baharestani	1st Place Clinical Research - Using Moulage to Simulate Pressure Ulcers- Validation by Wound Care Experts	CR-05

Benskin	Designing a Study to Obtain Accurate Wound Survey Data in Rural Areas of Developing Countries	CR-06
Boykin	Optimizing Consistency in Home Care Treatment of Newly Applied Skin Grafts	CR-07
Brennan	Trombley-Brennan Terminal Tissue Injury	CR-08
Brennan	*Prelude to Death or Practice Failure: Trombley-Brennan Terminal Tissue Injury	CR-09
